MEMORANDUM FOR:

DVPA/GOG/OIT

MDCA/GOG/OIT

MDCA/GOG/OIT

FROM:

Deputy Director of Information Technology - Operations

SUBJECT:

Appreciation for Telephone Display

I wish to thank you for your individual and collective contributions in developing the display which illustrates a significant part of the history of telephone service in the CIA. The display window in the Communications Operations Center provides both the Office of Communications and the Office of Information Technology with the opportunity to get our message across to the Agency population at large - our customers. The window serves an important "public relations" service for both offices. On behalf of both office directors, let me thank you for your participation in telling an important story of voice communications. It is most timely during this cutover to a new non-secure telephone system - a major event for CIA. Your efforts are appreciated and a copy of this letter will be placed in your permanent personnel file.
